

Earth 2 • Resources & Jewels CheatSheet

- The Resources are listed on the left side of the fields and the jewels that prime their production are listed on the right. On Jun 16 2024 there were 32 known Resources.
- The 8 Base Resources are found in the colored fields at the top.
- Most of the jewels listed in the grey fields can boost the production of 2 of the 8 Base Resources: Each of the blue dots on the grey fields connects to 2 white dots on the colored fields, indicating that e.g. a Garnet jewel will boost Sand and Iron production. Also, the same dots indicate that a Garnet jewel is created by combining a T3 Ochre and Sandy jewel.
